CompuGROUP supports computerizing of public hospitals in Malaysia

Koblenz – June 02, 2009: CompuGROUP Holding AG, one of the leading e-health providers worldwide, is supporting the implementation of a hospital information system (HIS) at the Bintulu Hospital in Malaysia. More efficient patient care as well as comprehensive cost savings is expected for Ministry of Health in Malaysia.

Within the scope of the 9th Malaysian five-year-plan, several district and regional hospitals will be outfitted with digital information systems. After the evaluation process being completed at the beginning of the year CompuGROUP's local subsidiary in Malaysia, Profdoc Sdn Bhd, was given the go-ahead to start implementation at the Bintulu Hospital, through a local government contractor. This is a 284-bedded hospital owned and operated by the Ministry of Health of the Malaysian Federal Government.

It is now Profdoc's mission to successfully implement a HIS for the Bintulu Hospital. The project will also include providing several clinical sub-systems and services including Business Process Re-engineering, Implementation, Training of users as well as Post-Implementation Support & Maintenance.

CompuGROUP utilizes its strength by sharing expertise and technology across countries and continents enabling knowledge transfer between healthcare providers. The HIS implementation for Bintulu Hospital will be the same product being used throughout the entire Karolinska University Hospital in Stockholm, Sweden. This is just one example that the substantial cost efficiency and high quality of CompuGROUP's products and services are based on the systematic use of best practice.

“With the implementation of the HIS, relevant medical information based on patient data is made available at the right time and the right place”, is how Rolf-Henry Grønlund, Managing Director of Profdoc in Malaysia, explains it. “CompuGROUP grows both organically and by making acquisitions. This optimum balance facilitates the growth required to achieve targets. For that reason, we are confident that we will be able to accelerate the potential growth of our products and services in emerging markets in Asia.” adds Grønlund.

About CompuGROUP Holding AG

CompuGROUP is one of the leading e-health companies in the world. Its software products designed to support medical and organizational activities in physicians' surgeries and hospitals, its information services for all parties involved in the health sector and its Web-based personal medical files contribute to the development of a more reliable and efficient health service system. The basis for the services offered by CompuGROUP is an unparalleled customer base comprising some 326,000 physicians, dentists, hospitals and networks, as well as other service providers. CompuGROUP is the e-health company with the widest global reach among service providers. The firm operates in 14 European countries, Malaysia, Saudi Arabia, South Africa and the U.S. and currently employs roughly 2,700 people.
