CompuGROUP continues to win contracts in Malaysia

Koblenz – September dd, 2009: CompuGROUP Holding AG, one of the leading providers of eHealth in Europe, continues to win contracts in Malaysia and has started the implementation of a Hospital Information System (HIS) at the new UiTM (University Teknologi Mara) Tertiary Medical Centre, Selayang campus in Kuala Lumpur, Malaysia. This is a brand new specialist medical center and more efficient patient care as well as comprehensive cost savings is expected for the Medical Faculty of UiTM.

After a lengthy tender process, CompuGROUP's local subsidiary in Malaysia, Profdoc Sdn Bhd, has been awarded the project and given the go-ahead to start implementation at UiTM through a local government contractor. This is a newly built center of excellence, owned and operated by the University Teknologi Mara which with its 120,000 students is the largest public university in Malaysia.

It is now Profdoc's mission to successfully implement a Hospital Information System (HIS) for all 30 specialist clinics at the UiTM Tertiary Medical Center, Selayang campus. The project will also include providing several clinical sub-systems and services including Business Process Re-engineering, Implementation, and training of users as well as Post-Implementation Support & Maintenance. With the implementation of our Hospital Information System, relevant medical information based on patients' data will be made available at the right time and the right place.

CompuGROUP utilizes its strength by sharing expertise and technology across countries and continents enabling knowledge transfer between healthcare providers to expand its global presence. The Hospital Information System implementation for UiTM, Selayang campus will be the same product being used throughout the entire Karolinska University Hospital in Stockholm, Sweden. Further, this is the same product as being implemented at Bintulu Hospital – a project that was launched and announced earlier

this year. This is just one example that the substantial cost efficiency and high quality of CompuGROUP's products and services are based on the systematic use of best practice.

“With the implementation of the hospital information system, relevant medical information based on patient data is made available at the right time and the right place”, is how Rolf-Henry Grønlund, Managing Director of Profdoc in Malaysia, explains it. *“CompuGROUP grows both organically and by making acquisitions. This optimum balance facilitates the growth required to achieve targets. “For that reason, we are confident that we will be able to further accelerate the potential growth of our products and services in emerging markets in Asia.”* Rolf-Henry Grønlund, Managing Director of Profdoc Sdn Bhd, Malaysian subsidiary of CompuGROUP Holdings AG

About CompuGROUP Holding AG

CompuGROUP is one of the leading e-health companies in the world. Its software products designed to support medical and organizational activities in physicians' surgeries and hospitals, its information services for all parties involved in the health sector and its Web-based personal medical files contribute to the development of a more reliable and efficient health service system. The basis for the services offered by CompuGROUP is an unparalleled customer base comprising some 326,000 physicians, dentists, hospitals and networks, as well as other service providers. CompuGROUP is the e-health company with the widest global reach among service providers. The firm operates in 14 European countries, Malaysia, Saudi Arabia, South Africa and the U.S. and currently employs roughly 2,700 people.
